

Name on Form 3800N

Social Security Number or Nebraska ID Number

1 a Enter the total kilowatt-hours of electricity generated by a new zero-emission renewable electric generation facility on or after January 1, 2011 and before October 1, 2011 (see instructions)	1a		
b Enter the total kilowatt-hours of electricity generated by a qualifying new renewable electric generation facility on or after October 1, 2011 (see instructions)	1b		
c Total (add 1a and 1b)		1c	
2 Nebraska Renewable Energy Tax Credit. Multiply line 1 by \$0.00075		2	
USE OF THE CREDIT			
3 Amount of credit from line 2 used to reduce Nebraska income tax liability. Enter here and on line 5, Form 3800N.		3	
4 Amount of credit from line 2 to be used for claiming refunds of Nebraska sales and use taxes paid by the producer of electricity generated by a qualifying renewable electric generation facility. Enter here and on line 1, Form 7		4	
5 Add line 3 and line 4. This amount cannot be greater than the amount on line 2		5	

INSTRUCTIONS

WHO MAY FILE. Any producer of electricity generated by a new zero-emission renewable electric generation facility or a new renewable electric generation facility located in Nebraska is eligible for a tax credit. The credit is calculated at \$0.00075/kilowatt-hour for electricity generated at the facility. To qualify, the facility must utilize eligible renewable resources (for example, wind, moving water, solar, geothermal, fuel cell, methane gas, or photovoltaic technology) as its fuel source.

NOTE: The total amount of Nebraska Renewable Energy Tax Credits that may be used by all taxpayers is limited. The tax credits will be allowed in the order in which tax returns claiming a renewable energy tax credit are filed.

WHEN AND WHERE TO FILE. Worksheet E must be completed and attached to the [Nebraska Incentives Credit Computation, Form 3800N](#).

C-BED PROJECTS. If the new renewable energy generation facility qualified for a sales tax exemption as a Community-Based Energy Development (C-BED) project, it is not eligible for the Nebraska Renewable Energy Tax Credit.

SPECIFIC INSTRUCTIONS

LINE 1a. Any producer of electricity generated by a new zero-emission facility located in Nebraska is eligible for a tax credit for electricity generated at the facility on or after January 1, 2011 and before October 1, 2011. To qualify, the facility must utilize eligible renewable resources as its fuel source, and its operation must result in no pollution or emissions that are or may be harmful to the environment as certified by the Nebraska Department of Environmental Quality (DEQ). For further information, please contact the DEQ at www.deq.state.ne.us or 402-471-2186.

LINE 1b. Any producer of electricity generated by a new renewable electric generation facility located in Nebraska is eligible for a tax credit for electricity generated at the facility on or after October 1, 2011 and before January 1, 2012. To qualify, the facility must utilize eligible renewable resources as its fuel source.

LINE 1c. Enter the total kilowatt-hours of electricity generated by a qualifying renewable electric generation facility during the tax year. Add lines 1a and 1b and enter the total on line 1c.

LINE 3. Enter the amount of the credit from line 2 which is being used to reduce the taxpayer's Nebraska income tax liability. This amount must also be entered on line 5, Form 3800N.

LINE 4. The credit may be claimed as a refund of **state** sales and use taxes paid, either directly or indirectly, by the producer. Claims may be filed quarterly for electricity generated during the previous quarter on or before the 20th day of the month following the end of the calendar quarter. A refund of state sales and use taxes paid must be claimed on a properly completed [Claim for Overpayment of Sales and Use Tax, Form 7](#). Attach a copy of the Form 3800N Worksheet E to your Form 7. You may only claim a refund of **state** sales taxes paid. Local sales taxes may not be refunded under this credit.
